

## Green Magic and the Dragon

Hermetic Doctrine:

Green = what is undigested.

Several myths find the dragon serpent with a fruit or herb of immortality.

The serpent of Polyides was reputed to carry an herb which could bring back life to the dead.

Venom of snake is understood as something to avoid, but also has great value as medicine. Damaged psyche strikes as a snake, and can serve as counterbalance to energies that have swung way to extreme; Venomous ‘hate and fear’ of depths and mystery of our Being. There’s always the More, no matter how far we look in or out, up or down. We’re constantly amazed; yet fear small things pestering us. We poison and kill them. Do we fear being seen ourselves as small pests we are to this planet, this universe? Earth in present state is suffering from lack of respect, virtually total abuse.

There’s an old Aramaic saying: ‘I will cast spells upon you with the spell of the sea and the spell of the dragon Leviathan’. Mistress of Salt Waters (womb of Being), whose son Leviathan (dragon of psyche) will be eaten (digested and understood) by faithful (those not duped) on Judgment Day (day of reckoning karmic debts).

Formed from dust of earth, Her son is Man. As Dragon wakes, world human psyche will become conscious, deepening perception of its Self and Universe Soul, within/without, out there, right here, encompassing. Past and Future unite always in Now.

Utilizing synchronistic Laws of Nature and Universe – using Dragon's breath, Breath of Life as catharsis – we could find our way forward (and back) into Nature’s Green Magic; receptive magic, Norse people called ‘greensward soft’. Living and learning with Dragon is being receptive to greening magic. Green is symbolic of Peace, of earth wisdom, regenerative life. Dragon devours universal knowledge, digests, understands, and so changes, rising in wisdom, into and through next Age of Reason, our reason, next phase or stage of life growing older, maturing; Evolving.

Great Pyramids, only one to remain of Seven Wonders of the World, a wonder of mathematical perfection, now in danger of extinction – decaying more rapidly than would be – as direct result of pollution caused by human tourists and ‘developers’ undermining them.

To those who persist in hurting this Earth, Dreams of the Dragon will become a nightmare, and panic will rule night and day. For ‘normal’ uncommitted folks there is still potential. Dreams of the Dragon are archetypal powers, reconnecting with androgynous Source of Universe, a reason, hope to dance through life without falling into a fiery pit, reflecting on what Christianity implanted into minds of unsuspecting; that

death and life are separate. Dragon shows they are not at all, biting its own tail, circle is complete, balancing opposites in motion with time. There is no substance to being; no proof of existence. Unknowable, cannot be spoken from where came the Word, LOGOS.

We enemy of Earth bring a toxic brown cloud, choking all life, including us. Science tells us it's the first time in our 4,000,000,000 year existence we've had to face such things we bring upon ourselves. But there was Atlantis myth. Who, as human inhabitant of 'civilized' world – the City – does not contribute? Laws are set up making it impossible not to. 'Health Department' deems it law to smother ourselves in plastic. They say, natural materials are unhealthy.

NEW YORK JOURNAL-AMERICAN  
SMOG, particularly serious in midtown Manhattan, almost obscures the Empire State Building.

Go to the mountain, and look back on the City that sprouts up like a wart from the landscape, rude interruption in beauty and grace of form Earth was created.

Black Magicians, observe emotional power in symbols and abuse it. Dragon will shock them into awareness of Why symbol portrays feeling and Why feeling projects symbol. It's necessary to learn formulation and processing to understand; but they use remedial knowledge to hold the world still, in their grasp; in their garbage, waste product, 'refuse' of power and domination. We produce what (¿filth?) not even earth can filter and cleanse for us. GodNature knows incineration is ultimate purifier, unless we voluntarily halt massive overflow. Disposable means 'out of sight, out of mind'.

Hard to believe humans cannot see symbolism in their reality; physical garbage represents mental and spiritual garbage; so, psychological garbage. "More Garbage," screams abysmal void, 'Evil It'. Droids comply. If people move, en masse, toward anything controllers do not control, especially what is provided by GodNature, it's quickly snatched away, to find reason to invent more laws to maintain control, continue separation from Life; using citizens to enforce laws against nature. Dissemination, not allowed unless you prostitute your Self, to disseminate only 'their' information.

Babylon was her place of birth; the Whore. We should strive for CityZenShip, not civilization. In *convenience*; not wanting to waste time, waste earth's resources, to provide all energy and packaging man 'desires'. Freedom from GridLock is to give up wasteful habits. Was earth created to be landfill for our garbage? Was the land empty, needing to be filled by our refuse? Landfills; where 'Developers' grow sub-divisions keeping 'their' economy alive; innocent children play in schoolyards, or their own yards, poisoned by toxic waste seeping out of the ground, from landfill, foundation on which sub-divided development was built. Shouldn't economy be about production of basic necessities? Our garbage turns against us. Do we ever *really* think about 'things' we use for convenience sake? Where it goes, *how many* people use *how much* every day – get it 'To Go' – then toss it? Out of sight, out of mind. Don't worry! Innovation makes styro cups into lawn furniture now, that blows through yards all over neighborhoods; and carpeting from plastic pop bottles, and other useless junk for the sake of 'economy'; in denial of our bad habit addictions. No one wants a land fill in their back yard, or nuclear

waste dumps. No one wants to live next to busy highway they commute. They have to be in *someone's* back yard. Who'll set aside bad habit conveniences, addictions, to limit this *need* for land fills, nuclear waste dumps, and incinerators polluting our atmosphere?

Instead of correcting the problem we mask the flaws. If we pointed the finger we would be pointing at ourselves.

As doctors once conquered midwives and healers, they now relieve symptoms of dis-ease, drugging us, separating us from roots of pain. If it becomes unbearable we subject ourselves to a 'root canal'; all feeling cut out, destroying sensors to pain and disharmony, warning signalers of invasive attacks.

We discover their poisons have cumulative effect on physical systems, as less perceptible poisons of mind, body and spirit had cumulative effect on generations. They just begin to notice, still refuse to read signs. If poison to kill whatever invader – weed or microbial enemy – is especially potent to consuming organisms, it is set aside, to find one with less apparent side effects, assuming if harm is not immediately visible the masses will not notice. It may take decades to manifest. They take our chances/choices.

In one paragraph it said, "... practically non-toxic," the next said, "Warning: Strongly urge public not to expose bare skin to sprayed area for at least a 72 hour period." Then if rain has not washed the poison into the earth they water it down to flow on to where? Third paragraph becomes clearer in case you did not catch it in first two: it is poison intended to cause death and harm to living things!

'Lawn Doctors' (it says on their truck) visit the neighbors every few weeks to spray poisons. They leave brightly colored little flags and signs. Who notices as soon as they leave the birds come down to eat bugs and worms, surfacing in toxic convulsions? Worms, birds; and deer who come to eat succulent shoots of green did not read the signs, how could they? But *they are only animals*; as are we.

Scientific fact humans were created omnivorous. We are what we eat, understand by what we eat. Cannibals ate chieftains. Priests of Baal ate babies. We eat animals, keep connection with animal world, animal dimension, animal realm. To eat is to digest and understand. We eat his body and drink his blood. Do we understand the ritual? In the Fall it fell into blind sacrifice. We shut doors; restrict flow of life giving waters; pressure builds. There's no match for power of water, desiring only good, and growing things. Environmental crisis is human one, as we depend on each other if we are to continue propagating our species. Poisoning our environment with 'killing' intentions, should we be surprised we invoke darker side of nature? All city lights on earth less than a hint of a flicker in infinite universe. There's eternity to explore if we do not destroy home base.

Greatest mother judges none. Regardless of who you are, white blood cells attack invading viruses and may spare your life for another day. Sym bio sys. She judges all. A diet based on modern 'goodies', called 'junk food' – full of white sugar, synthetic sweeteners and chemical additives – arouses her anger. We find ourselves riddled with all sorts of concerns medical industry finds very profitable. Homo Sapiens is a suicidal race. Viruses and fungi eat us alive. Nature is cruel. They say it is virus or germ responsible, causing plagues when each new one arises; refuse to accept they manifest as reflections of distortions humans activate, not allowing themselves to finely tune in to GodNature. Perfection freely offered since beginning, they won't allow. They held virus responsible for cancers as if it had nothing to do with condition of host. Tried to narrow it down to retrovirus; reflection of genetics in reverse. They synthesize what will kill invaders rather than prevent invitation. If we won't allow natural flow of evolution, this is natural reactive occurrence; reverse, devolution; this 'Virulent Crisis'.

Most believe if we cut back on production 'economy' will collapse. Do we need 'The Way It Is', or mother planet habitat? Best we prefer water filtered, purified by earth, to remember Her, a sacrament. Filtration systems Man invents disrupt the connection, allowing THEM to continue THEIR filthy habits. How do we breath, with bodies wrapped in plastic, more each day? Convenient life, convenient death. Paper or plastic? Smother or deforest Her? Greed markets landfills, to bolster 'manufactured' economy, an obsolete manmade invention, manufactured suicide machine. World of Man 'broke down' economy; originally "system of rules and regulations which control any work, whether divine or human, specifically .... operation of nature in generation, nutrition, and preservation of animals and plants; the regular harmonious system in accordance with which functions of living animals and plants perform." ~ Webster's

We trash this earth so people can have jobs! We would not have to work so hard if we did not produce so much trash. If we were hands-on involved with our personal garbage there would be much less. There's no *good* reason to work against beauty of this creation; plan-et, "Harmonious system!" We absorb superstition, taboo, traditions of ill omen without question, or thought. Man's Economic Administration; Science of useful application of wealth or material resources, Political Economy; man's simulation, monkey mimicry; miss-understanding, distorts truth. They see life in dollar \$ign\$, not the Green Magic we strive to incite. Jobs he invents do not benefit Human Life, only his pocketbook, social status in this cultural mirage, he sees with his hungry thirsting soul.

Who rules? Who makes the rules? What are the rules? Aristocracy of society he proposed ruled too long. They take everything. How do we allow greed to rule? We must be greedy in our Selves to honor it. So, we assume Dragon myth based on greed also, as it gave Beast authority. Seems new and different aristocracy; still aristocracy maintaining fear. Ignorance we let govern our societies, our lives, is disturbing. Far better a few old dotes die than thousands, or millions of naïve people too young to know; masses of ignorants, who if freed could learn; caught under domination tactics of Age of Patriarchs.

Guardian of the spring. Dragon means 'to see'. Who does the chalice serve? Filled with water from Holy, Sacred Well or Spring it is a scrying bowl to look into, see things needful to be done, for the Mother, for the Goddess. Die, old fools! Quickly, now, as those you terrorized all of these 6 thousand years. Die in fear and terror of Mother of us all; the Monster you made your Mother to be. Drink from holiest of her chalices. Die, to allow us Peace and Freedom that can be. Father forgive them? Mother will not. They

know what they do', and fear being thrown into lake of burning Sulphur; symbolic of desire to positive action and vital heat for warmth. They fear it will be painful to them.

If you separate \$ from communication, what do you have? Truth. If you disjoin \$ from living, what do have? Truth. If you separate \$ from happiness, what do you have? Truth. If you divorce your Self from aristocracy, what do you have? Truth. If there was no interest in monetary investment, what would we have? Truth; a different motivation for living. Hope at least, there could be an easier, more harmonious, truthful way.

Necessities of life beyond basics are not what they seem to most, considering our world void of money and garbage; and happy. Not to say money is evil; but their prayerful attitude toward it. Money is an invention, a tool used to build and/or destroy, as an aid or a weapon. As protection we will soon find it worthless. This is not the Green Magic we speak of. We sold out. Yup, that's right. If you look at a vehicle without polish, what do you have? If every one pointed their fingers, laughing when a Limousine rolled by, not wishing they were in it, what would we have?

New aristocracy no better than old. Taking over; still up keeping cause of overwhelming poverty. If \$ is the Way and Means, let it pour thru to proper receptacles and vehicles, to the destitute, deserving basic daily needs to live. Let us hear truth in news of damage in daily disasters and wars; not meaningless monetary losses. Money talks; only thing they listen to or for. \$ must be got by their traditional methods; therein is the flaw; not Green Magic we speak of. Change of conscious mind, not monetary circumstance, needs adjustment, fine tuning. Green Magic is fertility and vitality; change the binding agent; far removed from black and white lines of current value systems.

Only way out is thru; imbalance result of over-inflated Ego. Bubble needs bursting, like a big zit that's come to a head. To counteract overly active inflation it's necessary to apply and/or release pressure, outer and inner. Resulting 'economic' depression could allow time and space to see everything already easily, less wastefully produced, providing all real material needs. We need to discover our individual ways to build with it, in harmony. There'd be no demand for garbage if we took time to think about it. Time to commune with nature and our own offspring. To do this we must break or deflate bubble of neurosis also. They like flowers; buy them from vendors peddling genetically engineered, 'flawless' varieties, grown in sterile environments; or silk or plastic, needing no care. If they distance themselves any further from earth she will not support them. They like gardens but hesitate to accept the gift of freshest food from them, as they see dirt still clings. They want it washed, dried, and trucked in to them leaving dirt far behind. Take off those rubber gloves, gather dinner from the garden. Don't be afraid to touch the earth, and wash the bounty grown fresh daily in your own back yard.

Confused by their mother's neurosis, they carry it with them, taught it is some great sin to disagree with one's human mother. I cannot speak of it to them because they see only through distortion of their mother's eyes.

Green Magic gives more time to truly live and enjoy life. This time can't be bought. We sold out.

If human animal should smell different, what is fed through it makes difference, not whether we have hundreds of brands of perfumed, embossed toilet tissues, deodorant soaps, 'air fresheners'. Could give a long list neurotic culture insists they're dependent on. Be sure to buy 'Real Thing' and what symbolizes 'New Generation'. Newly forming minds of children are permeated with negligent information every few minutes all day, all week, month, year; all our lives as if of utmost importance. How many millions of dollars spent on any major corporate ad? How many millions of suffering, starving children? They tore down the Berlin Wall to put up a Berlin Shopping Mall!

Society sees symbol through rational, concrete thought, for use of industrial corporate complex. Symbol's attracting force matters if it brings money and power. How could we know how to read them; distorted by modern media misrepresentation. As anti-truth serum flashing into our minds, broadcast 'Live.' Symbols utterly abused, and power. We pay corporations to govern and control us starving masses.

Life in high tech industrial world is cosmetic, not knowing beauty or accepting what is beautiful, it re-makes, re-defines beauty; controlling what it is allowed to be, to manufacture beauty separate from what life gives us; Plastic Fantastic Lovers. In contemporary world men with money define art, define beauty, define meaning; creative principle distorted beyond recognition by highly neurotic modern society. Reading symbols bombarding us constantly in 'art' of our media, we see we have a low opinion of our Selves, and potential to survive to be more highly evolved, advanced Beings. Too many don't express truthfully. Is it irresponsibility, immaturity? 'Good things come easy at 7-11', an ad pushing that refreshing beverage, with much sought after sugar and/or chemical rush many are addicted to. 'Oh, thank heaven for 7-11'. Heaven, reminiscent of word haven; safe, protected place in the universe. Uni meaning one whole, not only.

There is always the More. Creator knows all, sees all, hears all. "He sees you when you're sleeping. He knows when you're awake. He knows when you've been bad or good. . . .", but it lost track. We're off track. Waste not, want not. Yuppies sold out. 'Natural Food Stores' owned and operated by *Investors* quickly became Yuppie junk food stores; all packaged, ready to eat, shipped from exotic places, too over-priced for common people to consider. Holy-isticalier than thou bestows bad name on 'healthy'. Common man sees it as a joke. New Age 'hype' makes good things look stupid. Speculation, intellectualization; selling ideas. Birth of New Age; a miscarriage. New Age ads like Old Age ads, selling a look, not realization. In the end, mighty dollar wins. There can be no real change until freely shared, affordable for all peoples.

If it's organic we must apply government controlled stickers from sheets of self-sticking plastic, 75% of end product waste, after pollution of earth, air and water from process of producing stickers. Even in the City laying beside the Sleeping Dragon parking tickets are now made from plastic. They encase themselves in plastic, smothering away their's and their children's lives; who they restrain in plastic carrying cases, and when they cry, stick a plastic nipple in their mouth to shut them up. Plasticity is a word which once meant 'the ability to change and be molded'. Our new formed plastics become brittle with age, to break. Their virtue in the beginning was they did not; but still pliable when heat applied, fiery breath of the dragon. We could again use plasticity to mean mobility, fluid ability to change and remold physical essence.

'Life' *advanced* civilization shows us is one Big Commercial Advertisement. Manmade advertised better, progressive; simulating, true reality as if what is created in

balance with us, inadequate. May be tasty but is it good? What does your body say? Can you hear it? How many have reason to see ‘Doctor’ and/or ingest chemicals, prescribed by Science, Authorized by Food and *Drug Administration*, to ‘correct’ conditions of body, un-balanced? What are the stats? Are you healthy and happy? Have you watched a friend or relative die of AIDS, the big ‘C’, suicide, gang violence, or just plain old war? When faced with death does whole value system change? Is that understanding plagues and holocausts should bring? Humans don’t think, they go for latest breakthrough advertised. In 1957 Asbestos was a miracle fiber. Johns-Manville advertised it so. How many perpetrators are still in business, or retired with a ‘healthy’ pension?

In the beginning we learned what was good for us, watching nature and animals. Now animals die in droves from our abusive living habits, poisons we feed our environment. Humans are also animals. We learned what is *good* for us watching nature, animals but refuse to see what is bad by same means. We hold fast to denial of our responsibility.

Neurosis distorts need in denial; revolving around intense scrutiny of mundane values. Blind objective crowds larger reality out of their lives, separating Self from life at every turn; denying creative need, destroying time to ponder it. They symbolize denial psychologically inherent in present society, replacing creation with formula. His world and invention is a lie. Liar is a harsh word to throw in his face, but we’ve not seen he is truth full; effectively separating Self from Life, Liberty and Pursuit of Happiness. Difficult to aspire to those lofty objectives. Cop out; easier to be led along path of ‘normality’. Psyche knows; disturbed it struggles in denial against guilt. Its struggle makes poison path more real. Neurosis, a trap unwittingly set, described in sound, a mass of rustling plastic, in smell, deodorant soap. We must turn to the Muse, turn music up to drown out noise of rustling plastic he provides her. Our mothers will tell us to this day plastic is safer as harm breaking glass does is visible. Harm plastic does to environment much more lethal, dangerous; easier to deny and plead ignorance. If we cared beyond small sampling of life in consciousness of this one little organism, it might help us care for others, care for life. They are unclean, know it, and the reason they are so hung up in their artificially scented deodorant soaps, swimming in them.

The Atlas myth? It is world of man, not earth, he holds on his shoulders. He desires to make noise, immature craving to create; rebelling against silence; he invents noisy tools and equipment. He hedges at the thought of using silent energy of sun, or soft sounds of wind turning turbines. Craving for noise connected to Ego. Man is God now; a dark God from our vantage point, under his shadow; a black hole in the universe, sucking energy from light of conscious expression and experience, destroying all that was created. He is a jealous god. See how he’s turned from nature myths, Earth’s story.

Original Flower Children, where are we now? We came out into light, brilliance of exploding colors; and action in the 60’s. Reaction so dangerous children shortly after retreated into darkness; bringing it out into full view, with shaven heads, wearing

celebration black; seeing no future to rejoice in, slipping thru shadows to deep, true darkness, where answers are; or chose a symbol, token group, club, gang; stepping into darkness to violently dare 'The Way It Is'. What has been done to them that nurtures their lives with Poverty of the Soul of Society. Some raised in 'Projects', a warped projection of what was meant to be Good; but is not. They are Rebels. They know what/who they rebel against, but not what for. Wounded animals lash out. How many gang members are born and raised in 'Projects', Slums, Inner Cities? Do they bring it upon themselves?

Serpent mind takes wing as Dragon Psyche. Heras/Heroes are bridges. Physical expression of dream born in the 60's, too off the wall, but truth remains; bridges must still be built, very soon. When we get to that crossing, finding balance should not be too difficult, but needs attention. Crossing any narrow bridge, concentrate on the other side. Avoid looking back or down; maintain balance to avoid a precipitous fall. We learned conditions it's possible to live under; what to sacrifice for a better way. We were Flower Children, Rainbow Children, recognizing bad habits of society enslaving us. Struggle was tough; many caught in tangles, surrendered back to distortion, sold out (Yup! That's right.) or ran to the hills, to begin again after the Deluge. New Age Light for Sale; eighty to a hundred dollars an hour, or more. You're invited to a ten day conference that will connect you with the Universe; make you a universal being, only \$200 dollars a day, to show you nature is free, freely given. Hurry before Authorities and Investors buy it up.

Macy's ad

We were freer when FM radio was commercial-less. Nice thing about 60's commercial *free* radio and *Free* Universities, they 'really were *free*'. We had a plan. It was necessary to move underground, to open *free*, non-commercial channels to speak and sing fragments of truth. But commercialism eventually ate into souls of many who sold out. Yup! Yuppie!

Society is set up to make us hate Mother, Motherhood, Mothercraft. Treated as slaves, they entrench and indenture us; barely allowed sustenance to meet humblest needs; *healthy* food, shelter. What more could we need than fresh food, clean air, pure water and sunshine? Ideally, we'd rather eat food not coated with plastic; enjoy availability, of food not smothered or poisoned; breath unpolluted air lungs were made for; drink water earth is allowed freely to filter. What reason could we have to ingest substances minds, bodies, and spirits cannot thrive on? If we dispense with garbage producing habits and activities, we're besieged upon by those wanting to force consumer commodities on us; seeing we possess little, materially, living simply. We decline; they think us ungrateful. What we want and desire cannot be given, but allowed, by disposing of garbage, a swift and complete halt to its production. They'll turn into maggots if they don't stop eating that shit, maggot mentalities. Many already have, in Muddled America; sole purpose to produce garbage, and multiply to express power to dominate all things surrounding them. Look at all we produced and developed. We were healthier and more satisfied before we began. Overindulgence creates obesity, unhealthy ugly. Maggot mentalities only know sitting in, and engorging on garbage. They suffer in ugly

organisms, think they're trapped by the 'way it is'. "Oh, I never thought about it," one said as if they never cared or dared to think, when introduced to a healthy alternative. They watch channel zero all day. What is 'Soap Opera'? Washing of the Brain?

Headline: 'HUMAN SOUL DIES OF CONSUMPTION'; Read all about it! It can't breath smothered by physical; sterilized encased in plastic. Is this murder or suicide? Genocide! We can't even go home to mother for comfort. She's been robbed of resources, and can use all the help and support she can get, we can give, before forced to abandon us. She is driven into a raging Lilith. Witness daily news. Mothers aborting, mothers abandoning, mothers abusing, mothers murdering fruits of their wombs. Breeding will must stop, until we find a better way.

How can we keep popping out babies if they can't play outside for fear of toxic waste seeping up from the ground, poisons to keep pests off lawns and fresh produce; or nuclear attack; or the guy down the street? We know. We saw the funeral procession. Abort! Abort! Let me out of this horror movie. Free the children! But they make laws forbidding abortion, and individual suicide, with or without assistance. Controllors have other plans to kill our young. They have a more important plan. The children can be all that they can be in the Army.

Current direction does not lead to a good place. It's obvious daughters and sons wish the Mother to die; Mother responsible for giving all life. Patriarch's wife who overlay truth of the Life Source Fountain sold out; Whore of Babylon. So, goddesses unite into one great dark goddess to pour her wrath over World Human Soul.

We're tired of excuses. World of Man is a shitty place. Witness Daily News. There's no excuse, except human ignorance (meaning to ignore) of reality of God, perfection. Not Man's God, GodNature, source of all life and energy; Creator, as it is, was, and will be. There are no excuses, only escapes, diversions, distractions, and void, nuclear void, to put our selves out of our misery; purifying fire, total war, genocide of our late great suicidal race. Blame it on the Dragon! Man beast was given authority. Dragon psyche is master of understanding. It is *we* devouring our Selves, like Ouroboros, earth also consumes itself. Our next food must needs be divine light, and supernal knowledge.

Remember to read the fine print

Green as color represents forces of nature. Gentle energies of rest, peace, sustenance and growing.

Even Green Movement is now overrun by fanatics who want to rule and control, so things are done 'Their way'. Fanaticism prey on truth. Converts are most fanatical of all, wild eyed zealots.

In the beginning was a 'word'. All things began from formation of a 'word', to tell a story; manifest visualization of something more than nothing. Creative expression of a dream. We are alchemists, we are creators, in God's image; can visualize formation of harmony from chaos, live something of value, more positive than negative; nothing, void. We can know, can talk about, and write about it. Must also lead exemplary lives.

Each myth is built on ruins of the last. As new, modern buildings upon ancient ruins in Acho, in Israel, where Jews and Arabs lived in relative peace for many, many years; new is so clearly laid upon foundations left from ruins of the old. Each myth overlaid by a New One, as we argue and war over which passing myth is real. Dragon wakes as each age moves on to next, its peaceful sleep disturbed. Who fears the Dragon?

Underworld, sub-conscious, slays monster holding back waters. It takes a lot of power to hold back water, sub-merged emotional floods. When He found it, He called it un-conscious, meaning it had no awareness, did not exist in 'his' real world. He did not want to face awareness it was sub-merged beneath, inside him, more obvious in her; denied. Conscious fears dreaming will devour, submerge, consume, take away consciousness; afraid to lucidly dream or recognize possibility of consciously dreaming balance; recognizing dream source of all there is. Dragon guards treasure, pearl of great price. Dragon possesses answers to lusts and desires. Dragon's lair, where treasure, things of value lie; deep, always deep, in the earth, in caverns to light. Protected by dragon and earth. Afraid to delve so deeply, blind our Selves in denial, make believe mundane, lesser things have great value;.

Society strives to turn lesser things to gold, to buy eternal life, controlling all they can. Seeking an alchemist who has a formula (being sure it is a man) and so use and abuse symbols presented, of no interest unless bringing material wealth. Our society does not accept transcendent understanding brought to us thru symbols; uses them to fabricate what it considers to be a more real dream, power and glory of personal I-am (ego) to separate I from Am, set aside truer glory and amazing realization of IAM Self creation of us; by what mysterious force. Dragon sleeps in them. We don't need to fully wake it, only enter its dreams to understand nature of life, change, and cycles of evolutionary spiral, as our humble planet whorls through the multiverse. There is always the More. And what lies beyond multi?

Fine strands we have with which to build a web. Bridge holocaust, birthed of chaos mankind led himself into. Such fine strands, each human psyche to network, joining all the pieces, so scattered. It's not a block of force we need to be, but integrated symbols of what is to become extended psychological web, global intuitive reaction, running strands of positive living energy around, between, all through planetary PSI bank. God is not dead, yet; there are embers to revive; blow on them with Dragon breath; then a living fire to fuel. Dragon's breath is catharsis. When personal dreams connect with dreams of Dragon, synchronicity and Dragon's sense of humor comes to front stage.

Synchronistic affirmations are signs to let us know in which direction we are moving, at least for each time being. Sometimes a checkpoint to reassess a situation. If Universe has a sense of humor it comes in guise of synchronicity; apparent random ‘happenings’ meeting up to form meaning, or relationship, as man and woman entangle themselves in true love making; embracing within a center – forever bound together in womb of being, the mediate of love longing.

Synchrone i.e., A curve, the locus of points reached synchronously by particles moving from a fixed point along curves of a given family. ~ Webster’s Synchrone: fixed. fluid being. Synchronicity: fixed meaningful moment. Synchroneity: fluid movement of/thru meaningful moments in our time/space continuum.

Further education for this spiritual revolution – meaning only change necessary to balance equilibrium – is not found in institutions or organized religions, although it is wonderful to come together, raising singing voices in praise to whatever god is. It is in our individual daily living expressions. We can dance away from complaints, together or apart, and find what nourishes us, all our hungers.

There are children, babies where bombs are falling. Only way to protect is stop planting horrors, stop reminiscing and celebrating horrors. With no roots, no sustenance, no support, they break down, dissolve. Where is your logic, Oh Man, who prides himself on logic? You think greater horrors and diversions will protect and banish dangers? Can extreme pollution of mind, body and spirit be purified? Only thru GodNature, creation. Don’t give us statistics and theories. Give us Hope, allow us Hope.

Photo by Soneile Hymn

The children cannot even begin to know what it is to smile, truly smile, where bombs are falling. What are their dreams and visions?

Why don’t we let go of directions not healthy for us? Why will we not accept natural, balanced gifts of creation that have always come in abundance? We don’t accept what is given, but desire control to manipulate all. We must prepare our children for importance of reasons to be alive, to continue exploration. All we can be is examples of what we discover, reflections of our world, as we see it, think we know it. Children’s reflections stand change differently. WE must allow freedom and right to know.

Looking for approval on such mundane basis as we humans led us far from seeing and doing what is more important. Underlying deep threat would be no threat if we had not strayed so far from Mother. We Younglings, living on this plan-et, very small plan in scope of the galaxy, the universe. Black hole is our fear of unknown, mystery, simply farther than we yet imagine, yet we see what we believe proof of them now; will get closer and closer until we see it just leads more quickly to a side we have not explored, that we can remember. History told us. Remember we believed once, not so long ago, if we sailed to the edge of our ocean, we would fall off into a great abyss, full of monsters and dragons. One myth that has not changed is dragons are lurking there to get us if we wander too far from the known, fall off the edge of what we think we know. There’s a whole universe to explore, then multi-verse. How many dimensions? Definitions of EVOLUTION do not go far enough in interpretation. Evolution is not finite, does not contain only past, but now, and future.

Green Magic is of Mother Earth; silently undermining hopeless bumbling of men, bashing each other's teeth out during prime time as wolf eats the sheep, being patted on the head by 'Evil It'. Old myth is re-emerging, of respect for all life forms, on all levels, in all universes, accepting all, moving in time thru the Dreams of the Sleeping Dragon.

They marched slowly down the street, unsmiling, some in shrouds, holding candles and signs. Mourning our loss, prematurely. They called it a protest, but it was without hope! We saw a funeral procession. We don't want to mourn, we want to live, to build new realities, find affinity, by knowing our Selves, and exploring life with friends and neighbors. We won't be a cause of our children's suffering, but a symbol of strength in freedom and peace that can be.

They celebrate war holidays with more enthusiasm than Earth Day. It's not a matter of marketing, but doing great works. Manifesting, not manufacturing. Life support system failing. Industrial dis-ease. Life energy low. Blinders close in; great dark shadow engulfs the world. OD; sucked into a black hole in universe of our minds, the abyss, void.

In Greek, dragon means 'to see', an art rarely if ever mentioned or taught by present existing social structures. Two thousand years the gate was narrow from human realm to dragon world. Jesus said, "The gate is narrow to the kingdom." But now wide open it flies, as dragons soar in human skies. Chinese say seeing dragon in clouds is good luck.

39. Dragon gate of the Finca Güell. One of the most elaborate examples of the wild exuberant of iron work in late 19th century Catalonia. The dangling chains are characteristic of contemporary gates

Wide open the gate swings as dreams of Sleeping Dragon emerge, like the force of Dark Mother, to change always resistant hierarchical structure where everyone dresses like plastic cogs in a plastic wheel; wrapped up, sealed in tamper proof plastic packaging; fed plastic food of white sugar lies; all in the name of what? Plastic money for plastic people to do plastic things; build plastic buildings for plastic happenings; erect plastic walls for plastic protection; against Dragon fire? The fire rages, walls melting down, fuming toxins over our once perfect earth.

And the seekers of Armageddon search in shadows of, for plagues already upon them, but they do not see, consider neurosis, psychosis, cancers and all diseases, diseases linked to our self-poisoned environment. They claim they are blameless, it is God's will, "That's the Way it is!" Their God said so.

That is the way they interpret it!
